

Based on the information found in the article [[The false promise of Biofuels](#)] how would you explain, using simple everyday terminology, that ethanol is not as “green” as we have been led to believe? Are there other examples of “green” products that might not be as “green” as we are led to believe? (Support your examples with peer reviewed data and site your references).

Note: This assignment counts as TWO (2) home works (20 points). Please no more than 2 pages maximum. List ALL names of your group at top of page.
